Summary

Computer Science undergraduate skilled in building REST APIs and full-stack applications using the MERN stack. Proficient in programming languages likes Python, Java. Interested in Artificial Intelligence, Machine Learning, and Generative AI, with the goal of growing as a Full Stack Java Developer and contributing to leading organizations such as JPMorgan Chase.

Education

2024-2026 | Computer Science Engineering **Anurag University** **(CGPA: 9.01)**

2021-2023 | Intermediate (MPC) **Sri Chaitanya Junior College** **(CGPA: 9.24)**

Technical Skills

Programming languages: C, Python, java

Web Technologies: HTML, CSS, JavaScript, React.JS, Express.Js, Node.JS

Database Management System: SQL, PostgreSQL, MongoDB

Tools: Git, GitHub, VS code, Postman, GitHub copilot

Concepts: Data structures, Algorithms, OOP, Operating systems

Projects

Convo – a real time chat application | HTML, CSS, JS, React, Express, Mongoose, Socket.io

- developed a real-time messaging platform allowing users to communicate instantly using WebSocket-based connections using socket.io . Implemented live message updates, user session management, and a responsive React interface.

Teach – a teacher review system | HTML, CSS, JS, React, Express, PostgreSQL

- Developed a full-stack platform for students to share and explore structured faculty feedback, helping them understand teaching styles and course expectations. Integrated an AI-powered summarization feature to generate concise insights from student feedback.
- Developed RESTful APIs and database integration to securely manage review submission and retrieval using Node.js, Express, and PostgreSQL

Achievements

- Solved 260+ problems on Leet code and GeeksforGeeks
- Achieved a campus rank of 219 on GeeksforGeeks

Certifications

- Full stack web development | **UDEMY**
- Machine learning | **NPTEL**
